

This is the tar file moved onto my local computer.

The above 2 images are pictures of the tar file being extracted to my computer.

This is the tarball extracted to a higher layer of the directory I made to store the contents to check if I made it correctly.

This photo shows the printed sequence of floats in ascending order.

```
dubejz@compile:~/Mydir
[dubejz@compile Mydir]$ seq 10 .5 20 > outfile2
[dubejz@compile Mydir]$ tac outfile2
20.0
19.5
19.0
18.5
18.0
17.5
17.0
16.5
16.0
15.5
15.0
14.5
14.0
13.5
13.0
12.5
12.0
11.5
11.0
10.5
10.0
[dubejz@compile Mydir]$
```

This photo shows the sequence of numbers printed in reverse after being stored in outfile2 by the previous sequencing method.
